## INTRODUCTION

# ENVIRONMENTAL BENEFITS OF COMPOSTING

Composting, a natural process that transforms organic waste into nutrient-rich soil amendment, offers a multitude of environmental benefits that resonate on both local and global scales. By diverting organic materials from landfills, enriching soil health, and contributing to carbon sequestration, composting stands as a powerful tool for households to make a positive impact on the environment.

### Waste Reduction

### Soil Enrichment

### Cost Savings

### Circular Economy

# INTRODUCING HARP HOME COMPOSTER

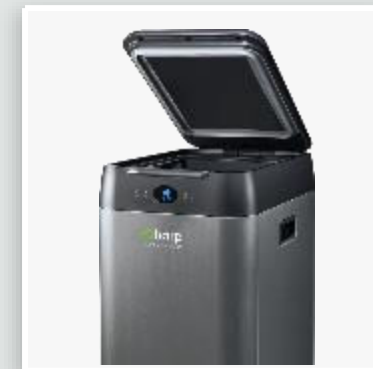

Our new Harp Home Composter is a compact, efficient and easy-to-use home composting solution that is designed to handle a variety of organic material, transforming your kitchen waste into enriched compost.

24 Hours Process

Automated System

Easy Setup

Low Maintenance

## KEY FEATURES & BENEFITS

Harp Home Composter presents specific features and benefits that contribute to its effectiveness in managing organic waste and promoting sustainability.

---

### **Efficient Composting**

Reduces a variety of organic waste by up to 85% in just 24 hours.

---

### **Consistent Results**

Provides controlled environment such as mixing, temperature, odour and moisture for optimal outcome.

---

### **Minimal Effort**

Requires less manual labor compared to traditional composting methods.

---

### **Nutrient-rich Soil**

Produces nutrient-rich compost that can be used to enrich soil, improving soil structure, water retention, and nutrient content.

# HOW IT WORKS

Begin by adding your food waste. When the lid is locked, the process starts and most of the waste is eliminated within twenty-four hours. Continuously add food waste as it is generated. Once the composting cycle is complete, scoop out the nutrient-rich soil and apply it to your garden, plants or pots. Restart the process as needed.

# DOS AND DON'TS

By adhering to these guidelines, you can make the most of your Harp Home Composter.

**Raw & Cooked Meat**

**Breads**

**Peelings**

**Eggshells**

**Coffee Grounds**

**Tea Bags**

**Expired Food**

**Bones**

**Medicine**

**Seashells**

**Paper Towels**

**Glass or Metal**

**Compostable Bags**

The end-product is safe for children and pets, but it is not suitable for human consumption.

|                       |   |  |   |

# USING COMPOST IN YOUR GARDEN

Compost is a valuable addition to any garden as it feeds plants with essential nutrients. Mix compost with soil to improve water retention, reduce erosion, and promote healthy root growth.

By using compost in your garden, you create a positive cycle that enriches soil, conserves resources, reduces waste, and supports a healthier environment both locally and globally.

- **Environmentally Friendly**
- **Higher Organic Carbon Content**
- **Well-balanced NPK Nutrition**
- **Slow-release of Nutrients**
- **Safe for Kids and Pets**

# TESTIMONIALS & SUCCESS STORIES

**Kieran Finnegan**

"I've been using the Harp Home Composter for 12 weeks, and have found it to be a great support in managing our food waste. This is positive addition to our household, with everybody finding it easy to use, as well as reducing the material going to landfill, and creating an useable by-product in terms of the compost."

**Elizabeth Sheridan**

"The home composter effortlessly breaks down food scraps into nutrient-rich compost overnight. It is so easy to use. Basically it will consume anything a human could eat. I then use the compost to enrich the soil in my hanging baskets, flower pots, vegetable patch or garden lawn, promoting healthy plant growth."

**Henry Mc Grane**

"As a family of 6 we can sometimes accumulate quite a lot of food waste which used to end up in our general waste bin, which often used to fill quickly and sometimes smelled awful. Since commencing use of the Harp Renewables Home Composter we no longer add any food waste to our general waste bin"

**Michael O'Donoghue**

"Having used the home composter for several weeks, I was very impressed with the sleek design of the machine, and it was also a nice size for the household. The instructions were easy to follow and after the initial set up of the machine there was very little to do. I would have no hesitation in recommending this machine to any household."
